SUMMARY

Machine Learning & AI Engineer with experience delivering **production-grade LLM applications**, **recommendation systems**, and **high-performance data pipelines**. Strong in **NLP (Transformers/LLMs)**, **MLOps**, and **search systems**. Proven impact across government and enterprise environments, focused on measurable outcomes, reliability, and scale.

EXPERIENCE

Machine Learning Engineer May 2025 – Present
Creed Infotech *Chandigarh, Punjab*

1. Led the vision, strategy, and execution of **Data Science and AI initiatives**, aligning advanced analytics and AI solutions with core business objectives.
2. Designed and deployed **AI-powered support chatbots** for **Vnaya** and **Virtue Legal Services**, improving customer support automation and response efficiency.
3. Built and deployed **voice-enabled AI agents** for **ValueLoads**, enabling intelligent voice interactions and automation of operational workflows.

Data Scientist Jul 2024 – May 2025
Primotech *Chandigarh, Punjab*

1. Architected and deployed **LLM-driven agents** using **LangChain** and **LangGraph** on the Rejara platform, enabling autonomous data collection and inter-agent collaboration.
2. Fine-tuned **Pegasus** (conversational summarization) and **BERT** (topic classification); built **Elasticsearch**-based recommendation pipelines, reducing manual review time and improving insight accuracy.
3. Developed scalable microservices and orchestration workflows, improving agent intelligence and platform adaptability across user segments.

Machine Learning Engineer Aug 2022 – Jul 2024
Sapio Analytics *Mumbai, Maharashtra*

1. Partnered with the **Assam Government** to analyze multi-year law enforcement patterns, informing more efficient patrol planning and resource allocation.
2. Built regression-driven driver performance clustering, increasing average driver income by **8–10%** and reducing attrition by **∼15%**.
3. Created an **LLM-based job assistance chatbot** integrated with personalized recommendations; recognized with **$10,000 in AWS credits**.
4. Optimized a **160GB+ internal data lake**: improved write throughput **40–50%**, reduced storage footprint **20%**, and improved response time **10–20%**.
5. Implemented a **PII detection** pipeline to enable compliant, secure data sharing.

SKILLS

Languages	Python
Machine Learning & NLP	LLMs, Transformers, Summarization, Classification, Clustering, Recommenders
Frameworks & Tools	PyTorch, TensorFlow, Scikit-learn, LangChain, LangGraph, LangSmith
Data & MLOps	Airflow, Docker, CI/CD, Microservices, FastAPI, Flask, Streamlit
Databases & Search	PostgreSQL, MySQL, MongoDB, Redshift, **Elasticsearch**, Pinecone

EDUCATION

Bachelor of Technology in Computer Science Engineering, Lovely Professional University 2019 – 2023
CGPA: 7.7/10

PROJECTS

Samarth Platform Enhancements — Built analytics workflows and **job-matching recommenders**; improved data ingestion and MIS reporting pipelines; implemented an **AI-powered bot** for data collection quality and coverage.

Neural Ocean (Internal Data Lake) — Implemented **DWH architecture** with Airflow, reducing analytical response times by **40%** and strengthening internal profiling capabilities.

Data Anonymizer (Govt. Initiative — 3rd Place) — Fine-tuned **DistilBERT** for PII detection; integrated **YuNet** for face anonymization; shipped a UI for customizable redaction rules.

Self-Driving Car Behavioral Cloning — Trained steering/throttle prediction model; achieved stable autonomous navigation on simulated tracks.

Real-Time Disaster Message Classification — Built an NLP pipeline to categorize crisis messages; deployed a real-time web dashboard for predictions.

Early Fire Detection (CNN) — Deployed image-based early fire detection for real-time hazard alerts.

ACHIEVEMENTS

- **3rd Place**, West Bengal Government Data Security Initiative (Data Anonymizer).
- Recognized for driving measurable operational improvements with production ML deployments.
